Faribault, Minnesota

The LEHMAN GARDENS, FARIBAULT, MINN.

Introduction

All plants and bulbs listed in this catalog have proven hardy with us where our winter temperature often goes to 30 degrees below zero. You can be assured that whatever plants you receive from us will be perfectly hardy for you regardless of where you live.

We are located fifty miles south of Minneapolis on Federal Highway 65.

HOW TO ORDER

We appreciate all business--no order too small or too large. Every order given equal consideration.

Remittance may be made by cash, postal, or express money order or personal check. When sending check, kindly add 5c for exchange fees.

ANOTHER 12% SAVING

We pay the transportation charges. Over a period of three years our average transportation charge has been 12%. We prepay charges--this saving is yours. When you order from us you know exactly what your stock will cost you delivered to your door.

OUR PRICES

All the plants we send out are a finished product best suited for your success. Everything we list is field grown with a good balanced root system. Our prices are lower not because of cheapened quality, but because we eliminate costly catalogs, advertising, and general overhead expenses. Give us a trial order and if you do not think the plants are as represented return them at our expense and your money will be cheerfully refunded.

ROCK GARDEN PLANTS

On the following pages you will find a list of the choice types and varieties for your rockery at very reasonable prices. Many varieties commonly called rock plants make excellent edging plants for the perennial border. Some of the taller varieties fit well into the front of the border.

	Three	Doz.
ACHILLEA Tomentosa. A woolly, carpet-like plant with finely cut foliage covered in Aug. and Sept. with bright yellow flowers. Excellent rock plant. Height 6-8 inches.50	\$1.50
ALYSSUM Saxatile (Goldentuft). One of the very best and most easily grown of all the early flowering perennials for the rock wall or rock garden. Covered in April with a mass of golden yellow flowers. Does well in ordinary soil well drained. Shows to best advantage in groups among rocks. Plant either in fall or spring. Height 8 to 10 inches.50	\$1.75
A. ROSTRATUM. Flowers later than saxatile over a long period. Straw yellow in color. Foliage silvery gray. Shrub-like plant 8-10 inches tall. Each 25c60	\$2.00

ALL PLANTS 20c EACH UNLESS OTHERWISE NOTED

ROCK GARDEN PLANTS

	Three	Doz.
ARABIS Alpina (Rock Cress). Heads of pure white flowers produced in dense masses in April. Ordinary soil that is not too damp is best for Rock Cress. Does well in dry rock walls. Plant in fall or spring 6 inches apart. Cut back after flowering to keep foliage neat and attractive. Height 6 inches.50	\$1.75
ARENARIA Montana (Moss Sandwort). Without a doubt the most lovely plant to use in filling the crevices between stepping stones. The bright green trailing mound-like foliage is covered with white star shaped flowers in May and June. Requires light sandy soil in sunny location. Height 4-6 inches. Each 30c75	\$2.50
ASTER Alpinus . A very satisfactory and easily grown perennial for the rock garden which produces rose-purple flowers in June and continues all summer. Most attractive in clumps and can be planted either in fall or spring. Height 6-8 inches. Each 15c40	\$1.35
A. GOLIATH . Very large purplish daisy-like flowers with golden centers on 12 inch stems. Blooms in May and June. Excellent in rock garden or in front of hardy border.50	\$1.75
A Mauve Cushion . Hardy Japanese specie forming round cushion-like plants 2 feet across and 6 to 8 inches high. Completely covered with mauve colored flowers during Oct. and Nov. Plant in full sun.50	\$1.75
AUBRIETIA (Purple Rock Cress). One of the most essential plants for the rockery or rock wall. At its best when placed to cover the face of a rock or fall from a crevice of a rock wall. Grows to perfection in rich well drained soil. Much used for covering bulb beds. Height 4 to 5 inches.50	\$1.75
CAMPANULA (Bellflower). Indispensable plants for every rockery and border. Perhaps one of the most popular species. They do well in ordinary rich soil and enjoy a cool or partly shaded spot. They should be lifted and divided every second year to insure free blooming.		
Carpatica . A very pretty plant growing in compact tufts and holding the many large blue bell-shaped flowers erect on wiry stems. A mass of color all summer. Plant in spring or fall about 8 inches apart. Height 8-10 inches. Each 25c..	.60	\$2.00
C. Rotundifolia (Harebells). Very fine to use in poor soil and crevices between rocks or over steep slope so as to show its pendant habit and color. Color blue. Plant in spring or fall 10 inches apart. Height 12 inches50	\$1.75
C. Garganica . Compact rosettes of shiny foliage with trailing stems covered completely with lavender blue star-shaped flowers with white eye. Excellent rock plant. Height 4 inches. Each 30c	.75	\$2.50
CERASTIUM Tomentosum (Snow-in-summer). Use in bold masses in rock garden or rock wall in ordinary soil in full sun. Low growing perennial with beautiful silvery white foliage covered with snow white flowers in May. Plant in spring or fall 10 inches apart.50	\$1.75
CONVALLARIA (Lily of the Valley). Everyone knows and loves the lily of the valley with its dainty white bell shaped flowers and sweet perfume. Does well in almost any soil but prefers a rich soil well fertilized. Does best in a shady place. Can be planted in fall or spring. Each 15c	.40	\$1.50
DICENTRA Exima (Fringed Bleeding Heart). A nice plant for the shady nook in the rockery. The fine fern-like foliage and rosy pink flowers give grace to the garden at all seasons. Plant in light shade in ordinary soil. It continues to bloom from June to Sept. Fine for the wild garden. Plant in fall or spring. Height 12 inches. Each 25c60	\$2.00

The LEHMAN GARDENS, FARIBAULT, MINN.

DIANTHUS (Pinks).

These old time favorite perennials with their rich colors and spicy fragrance are excellent for the rockery. No rock garden is complete without at least a few varieties of these beautiful flowers that add beauty that is permanent, as they live on from year to year. They do best in a dry light sandy soil. Plant in the spring or fall about 8 inches apart.

	Three	Doz.
D. Arvenensis. A wonderful carpeting variety. Spreading mats of gray-green foliage covered with small fragrant pink flowers from May to July. Height 2 to 3 inches. Plant spring or fall.50	\$1.75

D. Caesius (Cheddar Pink). The close growing tufts are very ornamental in the rockery even when not in bloom. The sweet clove scented pink flowers appear in May. Height 6-8 inches. Plant in spring or fall.50	\$1.75
---	-----	--------

A ROCKERY PLANTING

D. Deltoides (Maiden Pink). An easily grown and most beautiful prostrate plant for the rockery. Small rose colored flowers in profusion in June and July. Should be in every rockery. Height 6 inches.50	\$1.75
--	-----	--------

D. Plumarius (Pheasant's Eye Pink). A universal favorite of the pink family. Spicy fragrant rose-pink and white flowers all summer on 1 foot stems. Excellent for the rockery and front of border. Plant in spring or fall 8 inches apart.	.50	\$1.75
---	-----	--------

FUNKIA Lancifolia (Plantainlily). The leaves form a symmetrical rosette from which the flowering stems carrying many lily-like blue flowers appear in August and September. Excellent plants to be grown in rich soil in partially shaded rockeries or on the margins of water. One of the best edging plants. Height 12 inches.50	\$1.75
--	-----	--------

F. VARIEGATA. Like the above but having beautiful leaves margined deep green with a creamy white center. Excellent around pools or as a border to a walk. Will thrive and bloom nicely in the shade on the north side of a building....	.50	\$1.75
--	-----	--------

FESTUCA Glauca (Blue Fescue Grass). A group of this interesting grass adds delightful contrast to the rock garden. The very narrow bluish leaves grow in dense tufts 12 to 15 inches high..	.50	\$1.75
--	-----	--------

HEPATICA Acutiloba (Liverleaf). A very early native flowering plant well suited for the rockery. Plant in rich humus soil and shade. Does well on north or east slopes of rockery. The lavender or blue anemone like flowers appear in April. Plant in early spring or fall 6 inches apart. Height 4-6 inches. Large clumps with 6-8 flowering crowns. Each 15c40	\$1.25
--	-----	--------

ALL PLANTS 20c EACH UNLESS OTHERWISE NOTED

== HARDY NORTHERN GROWN LILIES ==

	Three	Doz.
HEUCHERA Rosea (Coralbells). The dainty rose-colored sprays of flowers add grace to the rockery or border most of the summer. The flowers are well adapted to cutting. Do best in a medium rich soil in full sun. Plant in spring or fall 6 inches apart. Height 15-18 inches. Each 25c	.60	\$2.00
H. Sanguinea (Coralbells). Tufts of heart-shaped leaves from which a dozen or more graceful sprays of dainty bright crimson flowers appear most of the summer. Well adapted to the rock garden or as an edging to a lily pool. Fine for bordering walks or perennial borders. Plant in spring or fall. 6 to 8 inches apart. Height 15-18 inches. Each 25c	.60	\$2.00

A
NATURAL
SCENE

IBERIS Sempervirens (Candytuft). Evergreen masses of pretty foliage covered with clusters of fragrant pure white flowers in May and June. A superb plant for rockery or rock wall. Plant in spring or fall 6 inches apart.	.50	\$1.75
IRIS Pumila (Baby Iris). Invaluable for planting in groups in the rock garden or edging the hardy border. Grow rapidly and produce many flowers on 6 to 8 inch stems in April and May. Mixed colors—blue, purple, yellow, and white. Each 10c	.25	.75
LILY Elegans . See lily section. Each 15c	.40	\$1.35
L. Tenuifolium . See lily sections. Each 15c	.40	\$1.35
MERTENSIA Virginica (Bluebells). Drooping clusters of pink buds changing to beautiful blue flowers in May. Perhaps the bluest and daintiest of all spring blooming flowers. Does well in ordinary moist soil in partial shade. Fine planted under trees. Plant tubers in fall or very early Spring 2 inches deep and 4 inches apart. Height 12 inches. Each 15c	.40	\$1.35
SAPONARIA Ocymoides (Rock Soapwort). A showy dwarf trailing plant well suited to rock garden or rock wall. Quantities of rosy pink flowers produced just above the foliage in May and June. Plant in spring or fall 6 inches apart.	.50	\$1.75
PHLOX Divaricata Canadensis . Our native lavender-blue wood phlox. A showy, easily grown free flowering native for the rock garden or semi-shaded border. Trailing dark green glossy foliage covered in May and June with multitudes of fragrant lavender flowers. A nice plant to use with darwin tulips. Height 10 to 12 inches. Each 15c	.40	\$1.35

NATIVE WILD FLOWERS

SEMPERVIVUM (Hen and Chicken)..

A rock garden without at least a few sempervivum can hardly be imagined. Their unique loveliness is appreciated by all. The little succulent plants are well adapted to filling in crevices among the rocks and the rosette-like thick leaves are very showy. Do best in a medium well drained sandy soil in full sun and can be planted either in spring or fall 4-6 inches apart.

	Three	Doz.
Arachnoideum (Cobweb Houseleek). So called because the small green rosette of leaves are connected by silvery thread-like hairs. Star shaped rose-colored flowers in July. Height 4 inches. ..	.50	\$1.75
S. Brauni. Medium sized rosettes with tips and outer leaves bronze to dull red shading to dull green at the base. One of the best.50	\$1.75
S. Doellianum. Hairy rosettes ½ to 1 inch in diameter freely produced, light green with bronze markings. Tips of petals connected with few silvery threads. Flowering stems 4 to 6 inches high and bright red. Native of Switzerland. Each 15c40	\$1.50
S. Funcki. Rosettes 2 to 3 inches in diameter and of reddish brown color tipped green. Colonizes quickly. Flowers reddish-purple on a 6 to 8 inch stem.50	\$1.75
S. Globiferum. Rosettes flattened 2 to 3 inches in diameter and of a gray green color. Flowering stems 10 inches high and pale yellow in color. Native of Russia.50	\$1.75
S. Soboliferum. Mature rosettes 1 to 2 inches in diameter. Dull green with brown tips. New rosettes detached easily and take root about the parent soon forming a large colony. A very interesting Sempervivum. Native to the mountains of Austria. Each 15c40	\$1.50
Tectorum. Perhaps the commonest and best of all sempervivums. Broad rosettes of green with reddish tips. Flowers pale red on fleshy stems. Height 12 inches.50	\$.1.75

SEMPERVIVUM BARGAIN

SPECIAL OFFER on above 7 Hen and Chicken 1 each packed and labeled for \$1.00 Postpaid.

STATIS Latifolia (See Lavender). Evergreen tufts of thick leathery leaves from which spring the flowering shoots with sprays of thousands of small lavender colored flowers in July and Aug. The flowers can be cut and dried for winter use. A sandy soil in full sun is essential. A fine plant for either border or rockery. Plant in fall or spring 10 inches apart. Height 15 inches.50	\$1.75
VERONICA Rupestris (Speedwell). Smothered in June with many bright blue flowers. Foliage thick mats of dark green leaves growing 3 to 4 inches high. Plant in ordinary soil in spring or fall 6 to 8 inches apart. A very dependable rock plant.50	\$1.75

COLLECTIONS

By ordering these collections you will find you can save considerably on the cost of your rock garden and still have the more desirable plants. This saving to you is possible because we can handle a collection of plants as cheaply as we can single orders. All plants in the collections are our one regular grade of finished plants best suited for your success.

BACKBONE COLLECTION

We are often asked for a list of ten plants that will do well in average soil under ordinary conditions which can be grown by the inexperienced rock garden fan. Here they are and include a blooming range from May to September. Try to beat it. 30 Plants in all. Plenty to complete a small rockery. Carefully packed and labelled.

3 Alyssum Saxatile	April	\$.50
3 Campanula Carpatica	All summer	.60

HARDY PERENNIALS

	Three	Doz.
ANTHEMIS Tinctoria. Good reliable garden plant growing in the poorest soil. Fine cut foliage and golden yellow daisy like flowers produced all summer. Fine for cutting50 \$1.75		
CAMPANULA Persicifolia (Peach Bell Flower). One of the best border Bellflowers. Produces many saucer like blue flowers in June and July. Fine for cutting. Likes rich soil in sun. Height 2 feet.50 \$1.75		
CHINESE Lantern (Physalis). Too well known to need description. Grown for its bright red fruits which when dried make splendid winter bouquets. Plant in rich soil in sun or light shade. Plant roots 2 inches deep. Height 2 feet.40 \$1.50		
CHRYSANTHEMUM Uliginosum (Giant Daisy). One of the most striking fall blooming perennials covered in Aug. and September with many white daisy like flowers 2 inches across. Height 3 to 4 feet.50 \$1.75		
DELPHENIUM (Larkspur). No garden however small is complete without at least a few delphenium. Probably the most popular flower grown. The new varieties and strains are to be marveled at. Delphenium like a good deep rich soil that has been limed and full sun. D. Belladonna Improved. A fine improvement on the old variety. Flowers larger on better plants. Light blue flowers produced all summer if not allowed to go to seed and if given plenty of moisture. By far the best Delphenium for cut flower purposes. Height 3 to 4 feet. Year old clumps from field that bloomed last summer.50 \$1.75		
D. Dreams of Beauty (Diener). This is the finest strain of Delphenium we have ever seen and one of the newest to be introduced. Wonderful iridescent blooms from lightest sky blue to deepest gentian blue, with orchid, lavender, rose, and pink shadings. Strong upright spikes. 5 to 6 feet tall. Both single and double flowers. You cannot be without some of these. Our prices are only possible because of quantity production. One year clumps from field that bloomed last year. Each 25c60 \$2.00		
HEMEROCALLIS Flava (Lemon Lily. Sweet scented lily-like flowers of the clearest yellow. Bloom in June. Long narrow foliage attractive at all seasons making it a fine border plant. Of the easiest culture. Height 2 feet.50 \$1.75		
HOLLYHOCK (Double). Great garden favorites of the easiest culture. Use for backgrounds or bold masses in the border. Colors: pink, crimson, salmon, rose, yellow, and white. Not separate. Each 15c40 \$1.50		
IRIS SEEDLINGS. We have a large lot of seedling Iris in many colors and combinations, that we are offering at these very reasonable prices. This is a good chance to add many colors to your collection for a very modest sum. Use them for mass plantings. Can be planted spring summer, or fall. Each 10c .25 .60		
LINUM Perenne (Flowering Flax). Beautiful masses of fine feathery foliage. Flowers masses of pale blue on graceful stems from June to Sept. Must be grown on ordinary light sandy soil in full sun. Plant in spring or fall 8 inches apart.50 \$1.75		

ORIENTAL POPPY

Without question the most dazzling and showy of all hardy perennials in point of colors and size. The Oriental Poppies bring the gorgeous and brilliant colors of the Far East silks to our gardens. They grow from three to four feet tall and far surpass the annual and biannual kinds in size, splendor and effectiveness.

The reason so many people fail to succeed with the Oriental Poppy is because they do not understand the simple requirements of the plant, which is almost the reverse of most plants. The roots should only be transplanted during the dormant season which is during July, August and September. The plant makes a leafy growth during the cool fall months which is very necessary. This growth is evergreen and in spring the flowering stems appear and after blooming the top apparently dies which is the natural rest period of the plant. This dormant season is the only period at which field grown plants can be moved. They do well in any ordinary deep soil and increase in size and number of blooms from year to year. Cover lightly with evergreen boughs or light hay the first winter after planting. We are listing only such varieties as we know are the cream of the entire list. All strong 2-year-old field grown plants.

Poppy plants are shipped during July, Aug. and Sept. ONLY.

ALL PLANTS 20c EACH UNLESS OTHERWISE NOTED

The LEHMAN GARDENS, FARIBAULT, MINN.

	Each	Three
Beauty of Livermore. A fine very large dark crimson with black blotch on the base of each petal.50	\$1.25
Mahogany. Darkest color of all Oriental poppies. The large flowers are carmine-purple almost the color of mahogany wood. Height 30 inches.35	.90
Mrs. Perry. The standard and perhaps the best all around pink poppy. Very large salmon-rose flowers with dark center. Very free blooming. Should be in every garden.35	.90
Orange Beauty. Flowers very large and of a beautiful orange shaded scarlet, with a large purple blotch at the base of the petals. Very free blooming.25	.60
Oriental Hybrids. A fine assortment of colors grown from seeds of the better named varieties. The greater percentage will be of the crimson scarlet shades. \$1.50 per dozen.20	.50
Olympia. Beautiful flame scarlet flowers overlaid with golden salmon. The only double variety and hence in great demand. The earliest of all to bloom. Height 24-30 inches.35	.90
Princess Victoria Louise. A pretty free flowering variety with flowers of a soft salmon-rose shading to blush-rose. Desirable.25	.60
Perry's White. A valuable addition to the list as it is the only really good white oriental poppy. Flowers are pure satiny white with a crimson-maroon blotch at the base of each petal.50	\$1.25

PHLOX

Without the Hardy Phlox our gardens would surely be barren during July, August and September when their brilliant colors overshadow all other perennials. Phlox can be used in masses in the perennial garden and clumps among the shrubbery are very effective. They thrive best in a partly shaded location in soil that is deeply dug, well drained but moist and the richer the better. Phlox must never suffer for want of moisture as the root system is very shallow so that during prolonged dry spells water should be applied freely. Can be planted either spring or fall 8 to 10 inches apart.

We are listing eight varieties which we consider to be the best in their respective colors. All strong field grown plants.

	Each	Three
Count Zeppelin. Very large pure white flowers with vermilion-red eye. A very clean looking phlox which does not fade in the sun. Very thrifty and free flowering and a good grower. Height 30 inches. ..	.20	.50
Eclairer. A brilliant rosy purple with lighter center. One of the best growers and without a doubt the best of its color. Height 26 inches.20	.50
Frau A. Buchner. An extra large pure creamy white blossom. Truss and florets extra large. Midseason. Height 25 inches.20	.50
Jules Sandeau. Large trusses of pure rose pink flowers on strong dwarf stems. One of the most delightful colors. Height 18 inches.20	.50
La Vague. A pure mauve with striking red eye. Midseason. Height 24 inches.20	.50
Miss Lingard. This is the everblooming phlox belonging to the suffruticosa type and has long shiny green foliage. Blooms from June to October. Flowers of the purest white. Height 24 inches.20	.50
Siebold. This is one of our favorites, flowers freely on strong stems. Color is a beautiful pleasing orange-scarlet with crimson center. Midseason. Height 26 inches.20	.50
Von Hochberg. A favorite because of the striking bright crimson color and free blooming quality. Midseason. Height 24 inches.20	.50
	Three	Doz.
PLATYCODEN (Balloon Flower). Very attractive plants growing about 2 feet high blooming in July and Aug. Buds resemble small inflated balloons. Flowers open bell shaped and a fine shade of blue. Must be grown in light sandy soil. Plant in spring or fall 10 inches apart.50	\$1.75
PYRETHRUM Roseum (Painted Daisy). Perhaps one of the most popular perennial plants for border and cutting. Daisy like flowers of pink, red, and white in May and June. Plant in spring or fall 10 inches apart	.50	\$1.75

WE PREPAY ALL TRANSPORTATION CHARGES

WILD FLOWERS AND PERENNIALS

NATIVE WILD FLOWERS

	Three	Doz.
ADIANTUM Pedatum (Maidenhair Fern). The most graceful of all hardy ferns. Should be protected from winds and given a moist rich soil. Plant in spring or fall 8 inches apart. Each 15c40	\$1.50
AQUILEGIA Canadensis (Columbine). A native columbine growing on dry rocky ledges in partial shade. Produces many scarlet and yellow flowers in May and June on plants 18 inches tall. Plant in spring or fall. Each 20c50	\$1.75
ARISAEMA Tryshyllum (Jack in the Pulpit). Interesting in the wild garden and of the easiest culture. The spathe is light green, more or less striped with brown. Bloom in April and May. Large pods of bright red berries remain after the leaves die. Does well in moist dense shade. Plant in fall. Each 15c40	\$1.50
DICENTRA Cucullaria (Dutchman's Breeches). Finely divided leaves and white flowers in long racemes resembling a small white Bleeding Heart. Blooms in April. Plant small bulbs 2 inches deep in fall. Loves a rich sandy soil and shade. Plant in Fall. Each 10c25	.75

LADY SLIPPERS

(Cypripedium)

Our much loved hardy native orchids which have sprung into popular favor the last few years for naturalizing in woodlands and for use in the rockery.

They love a cool moist shaded spot with soil that has a good portion of leaf mold or peat mixed in. Once planted they need little or no attention, excepting to be watered during prolonged dry spells. A mulch of 2 or 3 inches of leaves is advisable during the winter which can be left on to rot in the spring; thus keeping up a constant supply of leaf-mold over the crowns. A very striking picture can be made by planting them in colonies among ferns using *spectabilis* in the rear, *pubescens* in the middle and *acaule* in the front.

Planting can be successfully done in fall or very early spring while the plants are dormant. Plant in colonies 6-8 inches apart.

	Three	Doz.
Acaule (Lady Slipper—Moccasin Flower). The plant sends out two leaves at the ground level from which the flower stalk grows 8-10 inches high. The slipper-like flowers appear in May and are pink-purple in color. The first Lady Slipper to bloom. Each 25c60	\$2.00
Pubescens (Yellow Lady Slipper). The most widely planted of all hardy orchids and perhaps the easiest to grow. Does well in any partly shaded location that is moist. A beautiful thing to use along streams or beside pools in the rockery. The slipper-like flowers are a rich golden yellow with reddish-purple petals. Blooms in late May and June. Height 12-18 inches. Strong clumps. Each 35c.....	.90	\$3.00
Spectabile (Showy Lady Slipper). The grandest of all the Lady Slippers and one of the rare plants as the supply is always short of the demand. The great leafy stems grow to a height of about 2 feet and bear two or more flowers which are rose-pink and white in color. A large colony of this variety in bloom among hardy ferns is a sight not soon to be forgotten. Clumps. Each 50c	1.25	\$4.00

Collections

One each of the three varieties postpaid for	\$1.00
Three each of the three varieties for	\$2.50
Twelve each of the three varieties with twelve Maidenhair Fern included for	\$8.50

HEPATICA Acutiloba. See Rock Garden Section.

MERTENSIA Virginica. See Rock Garden Section.

PHLOX Divaricata. See Rock Garden Section.

SANGUINARIA Canadensis (Bloodroot). Pure white flowers with a small yellow center. The pointed buds and white flowers appear very early and come clasped by the unfolding leaves. Plant roots 1 inch deep in leaf mold soil in light shade in the fall. Each 15c..	.40	\$1.50
---	-----	--------

TRILLIUM Grandiflorum (Wake Robin). The most showy of our native early spring blooming flowers. The waxy three petaled flowers appear pure white changing to pink as the flowers age. Needs rich moist soil and shade. Plant tubers 2 inches deep in fall. Each 15c40	\$1.50
--	-----	--------

HARDY LILIES

Since the introduction of the beautiful Regal Lily from China less than thirty years ago the interest in hardy lilies has increased tremendously and it can safely be said they are becoming the most popular of all hardy bulbs. By making only a moderate planting one may easily have lilies in bloom from June until October—what is more beautiful than a bouquet of cut lilies for the house?

Taking lilies generally, they require a bit more care than some other garden plants, but one can easily learn the simple wants of the popular varieties and enjoy them in their own garden. Practically all lilies love leaf-mold. We have found that a mixture of peat, leaf-mold and sand has given excellent results with over twenty varieties. Most varieties prefer some ground cover at the base to protect the feeding roots from excessive heat. A mulch of peat 2 or 3 inches deep is beneficial at all times. Prices are for strong flowering size bulbs.

	Three Doz.	
Canadensis (Canadian Lily). A very abundant native hardy lily. Stems growing from 2 to 4 feet tall carrying many graceful flowers in July. Color varies from red to orange yellow spotted brown. Loves shade and lots of moisture. Plant in spring or fall 3 inches deep. Each 15c40	\$1.50
Candidum (Madonna Lily). Handsome large fragrant pure white flowers in June and July. Easy of culture. Can only be planted in July, August and September, as it makes a tuft of leaves in the fall which are very necessary. Fine northern grown bulbs freshly dug for each order. Height 3-4 feet. Plant 2-3 inches deep. Each 30c75	\$2.50
LILIUM Elegans . A dwarf lily that should be found in every rockery. It is an early blooming specie with the easiest possible culture and very effective grown in masses. The large upright cup-shaped flowers appear in June and are bright crimson orange with black dots. Plant in spring or fall 4-6 inches deep and 3-4 inches apart. Height 12-15 inches. Each 15c40	\$1 35
Elegans Alice Wilson . One of the prettiest of the entire group. A very rare and beautiful little lily with clear lemon-yellow flowers in June. Fine lily for the rockery. Plant in spring or fall 4-6 inches deep. Height 20 inches. Each 50c	1.25	\$4.50
Henryi (Orange Speciosum). A beautiful late blooming lily from the mountains of China. Does well in sun or shade, but color is a little better in partial shade. Flowers are orange-yellow banded with green. Blooms in August and September. Bulbs are very large and should be planted in spring or fall 8-10 inches deep. Height 4-6 feet. Each 35c	1.00	\$3.50
Pardalinum (Leopard Lily). Very showy strong growing lily with whorls of dark green leaves and clusters of recurved flowers on a 4-5 foot stalk. The blossoms are variable but usually deep orange, with maroon spots, the tips of the petals being a rich scarlet. The bulbs are curiously formed mats of short scaled crowns. Frequently takes two years to become established. Plant in fall 5 inches deep. Each 35c90	\$3.50
Regale (Regal Lily). Without doubt the finest of all hardy lilies and should be found in quantities in all gardens. No garden is complete without it. It is very hardy, easy of culture, free flowering and permanent. Does well anywhere. The large funnel shaped, very fragrant flowers are produced in July. The flowers are white slightly suffused with pink, with a golden center. Plant in spring or fall 6-8 inches deep. Height 4-6 feet.		
3-5 in. circumference, each 15c40	\$1.50
5-7 in. circumference, each 20c50	\$1.75
